Sprint 3 Plan
House Hub
July 13th 2020

Goals:
Get front-end design finalized
Delete from chores and bills in backend
Backend for Fixit
Verify group add codes
Finish any details to finalize project

1. User Stories
    a. User Story #: As a user, I want to know when someone leaves or joins my house group
        i. Tasks
            1. Get owner notified of members (Areman)
                a. Create link to send to housemates
                    i. Make join code in all caps
                    ii. Verify group add codes
                b. Display who is in the house
            2. Send message to chat when user enters or leaves (Rowen)
    b. User Story #: As a user, I want to use an app that has a consistent theme
        i. Tasks
            1. Finalize front end design (Leila)
                a. Create theme for all pages
                    i. Fix initial pop-up screen for login
                    ii. Change text field in Login to a label

    c. User Story #: As a housemate, I want to be notified when to pay the bills in advance
        i. Tasks (Patrick)
            1. Get familiar with Twilio
                a. Back-end functionality for sending notifications
            2. Add total amount that needs to be paid for bills
    d. User Story #: As a housemate, I want to be notified when to complete my chores
        i. Tasks (Humza)
            1. Get familiar with Twilio
                a. Back-end logic for sending notifications

b. Send notification when chore is assigned and day that must be completed
e. User Story #: As a housemate, I want an intuitive way to keep track of the chat's participants
    i. Tasks (Rowen)
        1. Finalize any other functionalities in chat
            a. Layout of chat
                i. Message header
                ii. Time
            b. Return button
f. User story #: As an app member, I want to be able to change my avatar (Rowen)
    i. Tasks
        1. Support photo uploading in firebase
   2. Connect database to ProfileView controller
